

BAUSCH+STRÖBEL
Maschinenfabrik Ilshofen GmbH+Co. KG
Parkstraße 1 - Postfach 20
74530 Ilshofen

PRESS RELEASE

Addition to the Bausch + Ströbel management team

From March 1st, 2018, Bernhard Frisch joins the management of Bausch+Ströbel Maschinenfabrik Ilshofen. The 49-year-old, who was born in the German federal state of Saarland and holds a degree in business management, will be in charge of the administrative departments.

Bernhard Frisch has until recently been working as Chief Financial Officer at Schunk GmbH & Co. KG and is apparently looking forward to new challenges: "Having the possibility to further enhance the processes of a world market leader and strengthen its standing in the administrative fields is what makes my new task attractive to me. I will be happy to contribute to continued and profitable growth at Bausch + Ströbel and to further expanding their position on the market and as a top employer in the region."

There is much going on in these fields: The company, which manufactures filling and packaging machines for the pharmaceutical industry worldwide, has been growing at a brisk pace over the past years. Back in 2007, it had a workforce of 800. Today, 1,400 employees are working at the headquarters in Ilshofen alone. Following the significant increase in personnel and the extensive construction measures accompanying this growth, further organizational development is now consistently being pressed ahead. The external advisory board implemented about one year ago actively supports the process.

Concerning Bernhard Frisch, both the advisory board and the partners are confident that they have found a specialist who, with all his experience and expertise, is the perfect match to complement the existing management team.

The family-run Bausch + Ströbel company deliberately relies on a mixed management team, consisting of partners and managing directors who did not start their professional careers at Bausch + Ströbel. The managing directors and partners are Markus Ströbel (Sales) and Thorsten Bullinger (Legal Department). Dr. Hagen Gehringer has been acting as Technical Director since 2013 and Gerhard Blumenstock is currently in charge of Production as an interim member of the management. In his position as Administrative Director, Bernhard Frisch will be responsible for Controlling, Accounting, Human Resources and other departments. In these fields, Bernhard Frisch is endowed with a huge treasure trove of experience. He held responsible positions in several enterprises over the past decades, where he initiated and successfully implemented a variety of change and improvement processes. His two previous employments were at Wilhelm Layher GmbH & Co. KG, manufacturer and dealer of scaffolding, event systems and height access solutions with a workforce of around 1,500, and Schunk GmbH & Co. KG, a company with a staff of about 2,800 that manufactures and sells clamping equipment as well as gripping and automation systems.
