

## Field Service Engineer (m/f/x)

### Your Responsibilities

To ensure prompt and flexible support for machinery at customer sites, we are establishing and expanding a dedicated team of service technicians.

- + Perform installations, commissioning, maintenance, troubleshooting, and modifications in accordance with customer requirements and established standards.
- + Effectively communicate challenges to technical support and implement on-site workarounds.
- + Conduct operator training and offer assistance to customers during production and shutdowns.
- + Foster ongoing customer satisfaction by addressing recurring issues.
- + Collaborate with the sales department to identify sales opportunities and actively participate in trade shows.

### Your Qualifications

- + Completed technical training as a mechatronics engineer, industrial mechanic, electronics engineer, or possess comparable knowledge and skills.
- + Substantial experience as a service engineer with a focus on complex specialized machinery.
- + Proficiency in English is mandatory.
- + Willingness to travel up to 50% international, demonstrating high flexibility, personal responsibility, and the ability to work under pressure.
- + Following a familiarization period in Germany, Ilshofen, the service assignment can be conducted remotely. The training period spans approximately 3-6 months, contingent on experience.
